Sensory Circuits at Home

FREE Training

SEND Occupational Therapy Team Training

Sensory Circuits are a series of motor activities that aim to support with sensory regulation. This training is delivered by SEND Occupational Therapy and we will explore the sensory systems, what a sensory circuit is and how you can implement one into your child's daily routine. We will also share some practical activity ideas and discuss a range of options, including both equipment-based and non-equipment activities, to help you adapt a sensory circuit to suit your home environment.

DATE: Tuesday 24th November

TIME: 9am

This training will run for around 2 hours

LOCATION: Yardley Wood Community Primary School

As there are practical elements involved in this training, please wear comfortable clothing and shoes.

If you don't feel comfortable completing any of the activities, please let the therapists running the training aware so they can make adaptions for you.

We kindly ask that you do not bring children to this training as it can impact on the training delivery and running of the sensory circuit.
